Education

Bow Valley College
Calgary, AB
Software Development
Diploma
GPA 3.93

Programing Languages

JavaScript, C#, C++, Java,
Kotlin

Database

MSSQL, MySQL, SQL Server

Technologies/Tools

HTML, CSS, React
React Native, C#.Net,
Node.js/Express, Git, Postman
Figma

Soft Skills

Self-Motivated

Manages task independently
and meeting deadlines with
minimal supervision

Problem Solver

Effectively troubleshoots issues
and implements long term solutions
in various projects

Work Under Pressure

Delivers high-quality work within
tight deadlines

Leadership and Collaboration

Effectively work and lead on a team

Personal Objective

As a recent graduate of Software Development, I am eager to leverage my academic knowledge and hands-on project experiences in software development to contribute to an Entry-Level Software Developer position. I am knowledgeable in various programming languages such as JavaScript, C#, MySQL, and frameworks like React.

Projects

- **Brightside Mobile Application** | Team Lead, Developer
JavaScript, React, Github, Expo

Led a team to port a online learning platform web application to a mobile platform using React Native, enhancing user accessibility and expanding the application's scope. Managed the project lifecycle from planning to developing, ensuring timely delivery and timely performance

- **School Registration System** | Developer
JavaScript, React, Github, MSSQL

Designed and implemented a comprehensive school registration system to streamline the registration process and reduce administrative overhead. Developed user-friendly interfaces and efficient backend process, improving registration efficiency

- **Financial Budget Mobile Application** | UI/UX, Developer
Java, Android Studio

Developed and designed an android mobile application for budget management, enabling users to track and manage their expenses efficiently.

- **Spotify Web Application** | Developer
Winforms, C#

Built a music streaming application using Spotify API with

to deliver projects on time

functionalities similar to Spotify, allowing users to create playlists, stream music and manage their library.
